

Elijah Moyer

[Web Portfolio](#) • (602) 919-5399 • elijahmoyer.developer@gmail.com • [Github](#) • [Linkedin](#)

Highly skilled Web Designer/Developer with expertise in front-end development and a strong foundation in web design principles. Proficient in **React, HTML, CSS, JavaScript, and Figma** with experience in building a variety of responsive, user-friendly, and visually appealing websites. Passionate about crafting modern web experiences, optimizing performance, and collaborating with teams to create seamless digital solutions.

Technical Projects

STOCK MARKET APP | PERSONAL PROJECT

[Live Demo](#) | [Github Repo](#) | [Figma Wireframe](#)

- Developed a React-based stock market search application that allows users to fetch and display real-time stock data.
- Implemented React Router for seamless navigation between search results and stock details.
- Integrated a financial API to fetch stock prices and company information.
- Designed a modern and responsive UI using Tailwind CSS for a clean user experience.
- Created Figma wireframes to plan and visualize the application's layout before development
- Optimized API requests and state management to ensure fast performance and smooth updates.

Tech Stack: React.js, React Router, Tailwind CSS, REST API, Figma

MOCK SHOPPING PAGE | PERSONAL PROJECT

[Live Demo](#) | [Github Repo](#) | [Figma Wireframe](#)

- Developed a multi-page shopping cart application using React.js and React Router.
- Fetched and displayed various product data using a REST API request.
- Implemented React state management for handling cart functionality and product selection.
- Designed a responsive and visually appealing UI with Tailwind CSS.
- Created Figma wireframes and prototypes to plan and refine the app's layout before development.
- Ensured smooth navigation between product pages, cart, and checkout using React Router.

Tech Stack: React.js, React Router, Tailwind CSS, REST API, Figma

MULTI-PAGE TODO APP | PERSONAL PROJECT

[Live Demo](#) | [Github Repo](#) | [Figma Wireframe](#)

- Developed a multi-page task management app using React.js and React Router.
- Implemented dynamic task sorting to categorize tasks into Completed, Due, and Upcoming.
- Enabled users to add, delete, and organize tasks into project folders for better productivity.
- Designed an intuitive and responsive UI using Tailwind CSS for an enhanced user experience.
- Utilized local storage or database integration to save and display user tasks when logged in.
- Optimized React state management to ensure seamless updates and smooth user interactions.

Tech Stack: React.js, React Router, Tailwind CSS, Local Storage/Database

Technical Skills

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **State Management:** React Hooks, Context API
- **APIs & Backend:** REST APIs, Fetch/Axios
- **UI/UX & Design:** Figma (Wireframing & Prototyping), Responsive Web Design
- **Version Control:** Git, GitHub
- **Deployment:** Vercel, Netlify

Education

LIBERTY HIGH SCHOOL

High school Graduate | August 2014 – May 2018 | Peoria, Arizona

- Business Foundations: Finances and entrepreneurship
- Computer Programming
- High School Diploma with a 3.4 GPA

NORTHERN ARIZONA UNIVERSITY

W.A Franke College of Business | August 2018 – May 2020 | Flagstaff, Arizona

- Intro to Business Law
- Computer Programming
- 2 years of College Experience
- 3.2 Cumulative GPA

UNC CHARLOTTE

Bachelor's of Computer Science | May 2025 – Expected Graduation 2027 | Charlotte, North Carolina
